# REPORT

OF THE

## SCHOOL COMMITTEE OF MONTAGUE,

FOR THE YEAR ENDING MARCH 1, 1877.

---

*To the Inhabitants of the Town of Montague:*

The members of the School Board present the following report for the year just closed :

It is not often man's lot to be able to say "all things well." Indeed he is fortunate can he say "most things well." We will only assume to say "many things well."

### SCHOOLS, TEACHERS, TERMS.

We have had under our care during the past year, seventeen schools, a new one having been formed at Turners Falls at the beginning of the year—viz.: The High School, one Grammar, three Grammar and Intermediate, two Intermediate, seven Primary and three ungraded.

In many of our schools we have seen the evidence of progress ; in some, while not failures, yet not fulfilling our hopes. In one or

two instances we fear we have failed to grasp the needs of the school.

There have been employed during the year, twenty-five teachers, most of them giving good satisfaction.

We have had, as usual, three terms of ten weeks each, (excepting in the High School, with terms of twelve weeks,) beginning in April, September and December.

### ATTENDANCE.

Our efforts and the efforts of our teachers to secure full and punctual attendance have been in a good degree successful. The parents in most cases have cordially seconded these efforts, and but very few instances of opposition have been brought to our notice. We have in our hands certain uncourteous and threatening notes to teachers wholly uncalled for, and which no doubt appear as ridiculous to the writer as to us, now that the second thought is given. The necessity of constant, punctual attendance at school needs no discussion. To gain profit as a member of a school, the scholar *must be present*. Does not the effect of early school life upon the character of the man warrant us in insisting, as far as we can, upon punctuality?

### COMPULSORY EDUCATION.

In this matter we are directed and controlled by law. There has been evident neglect on the part of some. We shall take measures to carry our part of the responsibility, and sincerely desire the co-operation of all in the difficulties which may attend an enforcement of the law. Especially do we desire the support of those at the head of our manufacturing interests. We expect public sentiment to sustain us.

## SCHOOL ACCOMMODATIONS.

These have been sufficient during the past year, and will be for the year to come, unless—and it is quite likely—another school be required at Turners Falls. Some of our school rooms and buildings are sadly in need of repairs. An appropriation is greatly needed and earnestly requested for such a purpose.

## EXPENDITURES.

There was appropriated for our use \$6000. We received from the State School Fund \$239.96. Our account upon a previous page will show that the greater portion has been expended for wages, fuel and care of school houses. There has been some unavoidable expense for repairs, and as no specific appropriation was made for this purpose, \$159.66 has been taken from the above appropriation.

The law permits us to expend a certain portion of the State School Fund for school supplies. During the year about 20 per cent. of this fund has been used, and Webster's Unabridged Dictionary placed in many of the rooms. Gradually we hope to furnish our schools with maps, charts, globes and other like helpful supplies.

The sum expended for transportation from what were formerly known as the North-West and South Districts is about \$200 less than the estimated cost of maintaining schools in school houses there. Tuition paid to the town of Leverett for scholars in the former Lafayette District is about \$120 less than the estimated cost of maintaining a school there.

The village schools have not been over-burdened by the transportation, while the scholars transported have, in the main, secured advantages superior to what small schools could afford.

The expense of transporting pupils to the High School was a manifest necessity, in order that localities remote from the village might have justice done them. It has also been for the interest

of the school itself. The committee have found this matter of transportation a difficult one to adjust to the exact needs and demands of the public. It is impossible to equalize it to their own or the parents' entire satisfaction. We believe it, however, expedient as an economical and educational measure.

### TEACHERS' WAGES.

The average wages per week paid the teachers (\$7.00 the lowest, \$13.87½ the highest) is about \$9.00. Employment furnished them thirty weeks. Average price of board about \$4.00. Most of them are without remunerative employment through the twenty-two weeks' vacation. Computing the net proceeds from their year's labors, suggests the question, How serious should be our apprehensions that they will retire so early upon their accumulations as to preclude the possibility of retaining even the most acceptable teachers for more than a limited time? Teachers should be persons of such attainment, intellectual and moral, as to deserve a remuneration equal to that paid in the factory or kitchen. We feel that our teachers are not, and have not been, overpaid. The average wages paid our teachers the past year have been less than the average for three years previous, as an examination of the State records will show. This is brought about chiefly by reducing the salary in the High School; also by an adjustment of salaries in some of the other schools.

### DISCIPLINE.

A word as to this mooted question. The following is suggestive: "*Exact but not severe.*" The day of indiscriminate, habitual flogging is about gone by, or at least should be used only as a final resort. These words might be shaped into a rule: "That *certain* punishment is to follow *every* offence is a much surer preventative

to lawlessness than the possibility of great severity with a chance of escape.”

## PARENTAL SUPPORT.

Much has been said and written by school committees, complaining of public indifference to the common schools. As a rule, the success of a school is guaranteed when it has the judicious and hearty support of the parents. At any rate, however good the school, however zealous the teacher, without this co-operation there can be, at least, but partial success. Among the many ways suggested of securing this co-operation, visiting the schools is the most common. It awakens pleasant memories, quickens new interest and gives to one a personal knowledge of the schools. We commend this subject. Every citizen is invited to personally inspect the schools. In a town like Montague with upwards of 700 families, more than 500 school children, \$40,000 invested in school property, annually appropriating \$6000 for the maintenance of the schools, do we unwisely express our regrets that less than five per cent. of the parents, and less than one per cent. of the fathers, have their names recorded as visitors in our public schools the past year?

Our report is not so extended as to need recapitulation. We commend the subjects briefly alluded to, to careful attention, hoping for increasing interest on the part of citizens in our educational interests, and for co-operation with the Committee in so far as they can be trusted to carry out their honest convictions.
